Rohan Iyer

Python Developer · Django · REST APIs

Bengaluru · rohan.iyer@example.com · +91 90000 10001 · github.com/rohan-iyer-dev

SUMMARY

Python developer with 1 year 9 months of experience building Django REST APIs for a fintech product. Comfortable owning features end to end, from schema design to deployment with Docker.

SKILLS

Python, Django, Django REST Framework, PostgreSQL, MySQL, REST APIs, Celery, Redis, Docker, pytest, Git, GitHub Actions, AWS EC2, AWS S3

EXPERIENCE

Python Developer — LedgerLeaf Fintech, Bengaluru | Jan 2025 – Present

- Built 30+ REST endpoints in Django REST Framework for loan applications and repayments used by 80,000 customers
- Designed PostgreSQL schemas and optimised slow queries with indexes, cutting p95 API latency from 900 ms to 210 ms
- Moved PDF statement generation to Celery workers with Redis, removing request timeouts during month-end peaks
- Wrote pytest suites that raised backend coverage from 41% to 78%
- Containerised services with Docker and deployed to AWS EC2 through GitHub Actions

Software Engineering Intern — LedgerLeaf Fintech, Bengaluru | Jul 2024 – Dec 2024

- Integrated a payment gateway webhook in Django with idempotent retry handling
- Fixed 25+ bugs reported by QA in the onboarding API

PROJECTS

Shop Inventory API

- Multi-tenant inventory API in Django REST Framework with JWT auth and MySQL

EDUCATION

B.E. Computer Science — Southfield Institute of Technology, Bengaluru | 2020 – 2024 | CGPA 8.4/10

CERTIFICATIONS

- AWS Certified Cloud Practitioner (2025)
