Python Developer (Django)

Kavya Infotech Solutions · Bengaluru, Karnataka (On-site) · Full-time · 0–2 years · ₹4–7 LPA

ABOUT THE COMPANY

Kavya Infotech Solutions builds billing and inventory software for 1,200+ small and mid-sized retailers across South India. Our engineering team of 40 ships weekly releases to a multi-tenant SaaS platform.

ROLE OVERVIEW

We are looking for a Python Developer to build and maintain backend services and REST APIs for our retail SaaS platform. You will work closely with the frontend and QA teams and own features from design to deployment.

KEY RESPONSIBILITIES

- Design, build and maintain REST APIs using Django and Django REST Framework
- Write efficient SQL queries and design schemas in PostgreSQL or MySQL
- Integrate third-party services such as payment gateways and SMS providers
- Write unit and integration tests and take part in code reviews
- Debug production issues and improve API performance
- Collaborate using Git with feature branches and pull requests

MUST-HAVE SKILLS

- Python (0–2 years of professional or strong project experience)
- Django and Django REST Framework
- SQL with PostgreSQL or MySQL
- REST API design
- Git

GOOD TO HAVE

- Docker
- Celery and Redis
- pytest or unittest
- Basic AWS (EC2, S3)

EDUCATION

B.E./B.Tech/MCA/B.Sc in Computer Science or a related field. 2025 and 2026 graduates with relevant internships are welcome.

BENEFITS

Health insurance, hybrid Fridays after probation, learning budget of ₹20,000 per year.
