Frontend Developer (React + TypeScript)

Pixelcraft Labs · Pune, Maharashtra (Hybrid) · Full-time · 2–4 years · ₹8–14 LPA

ABOUT THE COMPANY

Pixelcraft Labs builds web apps for healthcare and education clients in India and Southeast Asia. Our products are used by 2 million patients and students every month.

ROLE OVERVIEW

You will build fast, accessible user interfaces in React and TypeScript, work from Figma designs, and integrate with our REST APIs.

KEY RESPONSIBILITIES

- Build reusable React components in TypeScript
- Manage application state with Redux Toolkit or Zustand
- Integrate REST APIs and handle loading, error and empty states
- Write unit tests with Jest and React Testing Library
- Improve Core Web Vitals and accessibility (WCAG 2.1 AA)
- Review pull requests and mentor junior developers

MUST-HAVE SKILLS

- React (2+ years)
- TypeScript
- JavaScript (ES6+)
- HTML5 and CSS3
- REST API integration
- Redux Toolkit or Zustand
- Git

GOOD TO HAVE

- Next.js
- Tailwind CSS
- Jest and React Testing Library
- Web performance and accessibility

EDUCATION

Any engineering or computer science degree, or equivalent practical experience.
