Nikhil Bansal

DevOps Engineer · AWS · Kubernetes · Terraform

Noida · nikhil.bansal@example.com · +91 90000 50001

SUMMARY

DevOps engineer with 5 years running AWS and Kubernetes platforms for high-traffic SaaS products.

SKILLS

AWS (EC2, VPC, IAM, RDS, EKS, CloudWatch), Docker, Kubernetes, Helm, ArgoCD, Terraform, GitHub Actions, Jenkins, Linux, Bash, Python, Prometheus, Grafana, Trivy

EXPERIENCE

Senior DevOps Engineer — FleetTrack SaaS, Noida | Mar 2023 – Present

- Migrated 40 services from EC2 to EKS with Helm and ArgoCD, cutting deploy time from 45 to 8 minutes
- Wrote Terraform modules for VPC, IAM, RDS and EKS across 3 AWS accounts
- Built Prometheus and Grafana alerting that reduced mean time to recovery by 55%
- Cut the AWS bill by 28% with Spot nodes, rightsizing and Savings Plans

DevOps Engineer — ShipRight Logistics, Gurugram | Jul 2021 – Feb 2023

- Built GitHub Actions and Jenkins pipelines with automated tests and Trivy image scans
- Automated server patching with Bash and Python on 120 Linux hosts

EDUCATION

B.Tech Computer Science — Yamuna Institute of Technology, Noida | 2017 – 2021

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2023)
- Certified Kubernetes Administrator (2024)
