SUMMARY

Machine learning engineer with 5 years of Python experience, the last 3 building LLM products in production.

EXPERIENCE

Senior ML Engineer, Lumen Docs (fictional) — Jan 2022 to Present
- Built a RAG pipeline over 2 million enterprise PDFs using LangChain, OpenAI embeddings and Pinecone; cut answer latency by 40%.
- Designed prompt templates and an evaluation set of 600 questions; tracked faithfulness with RAGAS.
- Shipped FastAPI services in Docker on AWS (ECS, S3, Lambda) serving 50k queries a day.
- Fine-tuned a Llama 3 8B model with LoRA (Hugging Face PEFT) for domain classification.

Data Engineer, Brightline Insights (fictional) — Jul 2020 to Dec 2021
- Wrote Python ETL jobs and complex SQL on PostgreSQL; set up CI/CD with GitHub Actions.

EDUCATION

B.Tech, Computer Science, 2020

SKILLS

Python, SQL, LangChain, Pinecone, FAISS, FastAPI, Docker, AWS, RAGAS, Hugging Face, LoRA
